DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Terasawa et al (6,147,714) in view of Wasilewski (5,420,866).

Regarding claim 1, Terasawa discloses providing a plurality of transport streams (see fig 1) which are MPEG encoded and output from a plurality of MUX's (304-1 to 304-8). It should be noted that each transport stream inherently comprises an "elementary stream". Terasawa also discloses wherein the elementary stream represents an IPG page each stream output from from MUX's (304-1 to 304-8) have an icons and EPG data (see fig 1 and col 3 lines 35-65 and col 4 lines 7-21). Terasawa also discloses each IPG page has an associated guide portion (fig 1 – EPG data generating device) and a common video portion (see JPEG video encoder).

Ludvig fails to disclose the claimed grouping elementary streams with related IPG pages within a common transport stream. Wasilewski discloses a

group of related elementary streams which are part of a transport stream can be extracted to produce a complete program (see col 2 lines 30-62). It would have been obvious modifying Ludvig to include grouping the elementary streams would have enabled all the related IPG pages to be transported in the common transport stream would have enabled a faster simpler means for producing and displaying related IPG pages.

Allowable Subject Matter

Claims 4 – 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Guo et al (6,173,330) – Delivery and acquisition of data segments

Mori et al (6,191,782) – Method for displaying IPG information at high speeds
